1. Five-company sample: five-year patterns

All figures use audited standalone/unconsolidated accounts. NWC is PKR million; EPS/BVPS are Rs per share; days are rounded. Means include numeric zero, exclude n/m and include KOHC. The sample is not the entire Pakistan cement industry.

Sample mean	FY2021	FY2022	FY2023	FY2024	FY2025
Current Ratio	1.41x	1.31x	1.32x	1.57x	1.95x
Quick Ratio	0.75x	0.66x	0.71x	0.94x	1.30x
Cash Ratio	0.20x	0.14x	0.15x	0.18x	0.28x
Net Working Capital	6,079.14	7,091.58	10,807.10	13,298.80	22,622.67
Inventory Turnover	3.49x	3.43x	3.28x	3.25x	3.00x
Receivables Turnover	22.06x	30.31x	31.43x	28.82x	25.93x
Days Inventory Outstanding	111	112	115	114	123
Days Sales Outstanding	18	12	13	16	19
Fixed Asset Turnover	0.91x	0.96x	1.04x	1.08x	1.12x
Total Asset Turnover	0.53x	0.54x	0.58x	0.57x	0.53x
Debt Ratio	37.54%	43.27%	45.01%	41.91%	37.00%
Debt-to-Equity Ratio	0.30x	0.40x	0.40x	0.30x	0.21x
Total Debt-to-Total Capital	21.47%	26.67%	26.22%	21.69%	16.30%
Times Interest Earned	25.63x	18.83x	9.51x	11.64x	22.44x
Gross Profit Margin	23.72%	25.89%	25.60%	28.47%	33.84%
Operating Margin	22.57%	22.69%	21.87%	27.30%	35.50%
Net Profit Margin	15.41%	11.97%	11.86%	13.28%	21.83%
Return on Assets	8.20%	6.54%	7.14%	7.68%	11.65%
Return on Equity	12.96%	11.17%	12.31%	12.52%	18.35%
Return on Invested Capital	11.58%	9.56%	10.97%	12.31%	17.43%
Basic Earning Power	12.00%	12.48%	12.98%	15.57%	18.95%
Earnings per Share	15.53	17.13	19.81	29.88	24.79

Price-to-Earnings	12.60x	7.35x	7.19x	20.50x	8.77x
Market-to-Book	1.55x	0.75x	0.74x	1.01x	1.54x
Dividend Yield	0.17%	0.32%	0.69%	1.20%	1.03%
Enterprise Value/EBITDA	7.71x	4.50x	4.15x	4.15x	4.95x

FY2024-FY2025: current/quick cover, gross/net margins and TIE improve across all five firms. DSO rises in all five; inventory turnover falls in four. Ratios of liabilities/debt to assets/equity fall, although KOHC and FCCL IBD balances rise. Distinguish a falling leverage ratio from debt repayment.

Mean P/E falls largely because DGKC recovers from weak earnings; three other P/Es rise. Mean EPS/BVPS declines are distorted by LUCK share denomination changes and are not evidence of declining aggregate PAT. NWC counts are 4,4,3,4,5 in FY2021-FY2025; some FY2023 loss-based means also have four observations.

2. FY2025 peer comparison and scope limits

Measure	KOHC	LUCK	DGKC	MLCF	FCCL	Mean
Current Ratio	3.31x	1.71x	1.85x	1.53x	1.32x	1.95x

Dividend Yield	0.00%	1.13%	1.21%	0.00%	2.80%	1.03%
Enterprise Value/EBITDA	3.65x	8.53x	4.52x	3.44x	4.58x	4.95x

KOHC leads latest margins, returns and TIE with low financial leverage; LUCK leads cash cover; MLCF leads total-asset turnover and has lower P/E/EV multiples; DGKC shows strong recovery; FCCL has the highest historical yield. Different strengths do not establish one universal best investment.

Important pending classification: KOHC FY2025 short-term borrowings of 3.704884m are described in official note 11 as mark-up, with principal utilization nil. The current workbook still includes this amount in IBD after separately removing long-term mark-up. Under its principal-only definition, IBD should be 2,238.916660m rather than 2,242.621544m. D/E still rounds to 0.05x, but debt/capital and ROIC require a targeted review. This report preserves current workbook figures and flags the issue; it does not silently correct them.

KOHC: five-year results and performance

Measure / PKR m where stated	FY2021	FY2022	FY2023	FY2024	FY2025
Net sales (PKR m)	24,057.4	32,876.9	38,921.6	38,647.8	37,535.7

Enterprise Value/EBITDA	7.03x	2.85x	3.04x	3.22x	3.65x

The five-year result is stronger liquidity cover, lower financing ratios and higher returns, alongside slower inventory movement. In FY2025 revenue declines but gross profit rises because cost of sales falls faster. Core operating profit and other income both contribute; lower interest supports PAT and TIE. Directors discuss fuel/energy efficiency, investment requirements and buyback activity (FY2025 PDF pp26-27).

KOHC FY2025 directors report pp26-27; cash flow PDF p73; notes 6.1, 10, 11 and 44.

KOHC: why liquidity, efficiency and debt moved

FY2024 -> FY2025. Driver percentages compare the actual numerator and denominator, using unrounded workbook inputs. Rising CA or falling CL raises Current Ratio; a falling ratio requires the denominator to outgrow the numerator, or the numerator to fall faster.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
1. Current Ratio	2.90x -> 3.31x	Current assets +19.88%; Current liabilities +5.10%. Both rise; the numerator grows faster, raising the ratio.
2. Quick Ratio	2.22x -> 2.67x	Quick assets +26.29%; Current liabilities +5.10%. Both rise; the numerator grows faster, raising the ratio.
3. Cash Ratio	0.10x -> 0.12x	Available cash equivalents +31.57%; Current liabilities +5.10%. Both rise; the numerator grows faster, raising the ratio.
4. Net Working Capital	21,116.76 -> 26,953.09	Current assets +19.88%; current liabilities +5.10%. The signed CA-minus-CL balance improves.
5. Inventory Turnover	3.60x -> 3.02x	COGS magnitude -16.71%; Average inventory -0.99%. Both fall; the numerator falls faster, reducing the ratio.
6. Receivables Turnover	23.31x -> 19.74x	Net sales -2.88%; Average receivables +14.68%. A lower numerator and higher denominator both reduce the ratio.
7. Days Inventory Outstanding	102 -> 121	Average inventory -0.99%; COGS magnitude -16.71%. Both fall; the denominator falls faster, raising the ratio.
8. Days Sales Outstanding	16 -> 18	Average receivables +14.68%; Net sales -2.88%. A higher numerator and lower denominator both raise the ratio.
9. Fixed Asset Turnover	1.74x -> 1.61x	Net sales -2.88%; Closing net PPE +5.43%. A lower numerator and higher denominator both reduce the ratio.
10. Total Asset Turnover	0.66x -> 0.56x	Net sales -2.88%; Closing total assets +13.51%. A lower numerator and higher denominator both reduce the ratio.
11. Debt Ratio	30.17% -> 28.20%	Total liabilities +6.12%; Total assets +13.51%. Both rise; the denominator grows faster, reducing the ratio.
12. Debt-to-Equity Ratio	0.0524x -> 0.0468x	IBD +4.16%; Common equity +16.71%. Both rise; the denominator grows faster, reducing the ratio.
13. Total Debt-to-Total Capital	4.98% -> 4.47%	IBD +4.16%; IBD + equity +16.08%. Both rise; the denominator grows faster, reducing the ratio.
14. Times Interest Earned	22.32x -> 58.96x	EBIT +25.17%; Expensed interest -52.61%. A higher numerator and lower denominator both raise the ratio.

Inventory and receivables are two-point averages; PPE/assets/equity/capital are closing balances. Cash means audited available cash equivalents. NWC is a subtraction; n/m can conceal a real signed deficit under the display convention. Debt classifications follow the current workbook, including the KOHC caveat on page 2.

Latest fixed-asset turnover falls while the other four peers improve. Inventory/receivable days rise. A high current ratio does not turn all short-term investments into immediately available cash. Debt-based figures retain the classification issue disclosed on page 2.

KOHC: why profitability and market measures moved

FY2024 -> FY2025. Percent growth explains arithmetic direction, not an independently proven operational cause. Market ratios use compatible price/share bases within each year.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
15. Gross Profit Margin	29.13% -> 39.22%	Gross profit +30.78%; Net sales -2.88%. A higher numerator and lower denominator both raise the ratio.
16. Operating Margin	37.32% -> 48.10%	EBIT +25.17%; Net sales -2.88%. A higher numerator and lower denominator both raise the ratio.
17. Net Profit Margin	23.01% -> 30.84%	PAT +30.15%; Net sales -2.88%. A higher numerator and lower denominator both raise the ratio.
18. Return on Assets	15.11% -> 17.33%	PAT +30.15%; Total assets +13.51%. Both rise; the numerator grows faster, raising the ratio.
19. Return on Equity	21.64% -> 24.14%	PAT +30.15%; Common equity +16.71%. Both rise; the numerator grows faster, raising the ratio.
20. Return on Invested Capital	21.53% -> 23.46%	NOPAT +26.47%; Invested capital +16.08%. Both rise; the numerator grows faster, raising the ratio.
21. Basic Earning Power	24.51% -> 27.03%	EBIT +25.17%; Total assets +13.51%. Both rise; the numerator grows faster, raising the ratio.
22. Earnings per Share	45.27 -> 59.84	PAT +30.15%; Weighted shares -1.53%. A higher numerator and lower denominator both raise the ratio.
23. Book Value per Share	209.79 -> 260.82	Common equity +16.71%; Closing shares -6.13%. A higher numerator and lower denominator both raise the ratio.
24. Price-to-Earnings	5.53x -> 6.34x	Share price +51.48%; Compatible EPS +32.18%. Both rise; the numerator grows faster, raising the ratio.
25. Market-to-Book	1.19x -> 1.45x	Share price +51.48%; Compatible BVPS +24.32%. Both rise; the numerator grows faster, raising the ratio.
26. Dividend Yield	0.00% -> 0.00%	No dividend is attributable to either FY; the numeric yield remains 0.00% despite the price change.
27. Enterprise Value/EBITDA	3.22x -> 3.65x	Enterprise value +40.52%; EBITDA +23.79%. Both rise; the numerator grows faster, raising the ratio.

Operating cash flow rises from 6,647.17m to 9,378.29m. Investing uses 4,398.60m and financing uses 4,631.64m, leaving a 348.05m cash increase. The 12m-share buyback reduces nominal capital by 120m but costs 4,709.37m in cash. Dividend cash payments settle older liabilities; no FY2025 dividend is proposed.

Use this answer structure: state the ratio movement, identify numerator and denominator changes, compare the sample, then explain a supported business cause and limitation. No ratio alone proves liquidity, operational efficiency or investment value.

KOHC FY2025 directors report pp26-27; cash flow PDF p73; notes 6.1, 10, 11 and 44.

LUCK: five-year results and performance

Standalone sales and PAT grow across the five-year endpoints, with substantial investment income and cash-equivalent holdings. FY2025 CA expands far faster than CL. ROA improves, but ROE edges down because equity grows faster than PAT; BEP declines because assets grow faster than EBIT. Parent investments can reduce asset turnover without adding investees sales.

LUCK FY2025 report: business review PDF p144, reporting entity note 1 p245 and standalone statements pp241-244; corporate-action evidence in Audit.

LUCK: why liquidity, efficiency and debt moved

FY2024 -> FY2025. Driver percentages compare the actual numerator and denominator, using unrounded workbook inputs. Rising CA or falling CL raises Current Ratio; a falling ratio requires the denominator to outgrow the numerator, or the numerator to fall faster.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
1. Current Ratio	1.26x -> 1.71x	Current assets +46.89%; Current liabilities +8.22%. Both rise; the numerator grows faster, raising the ratio.
2. Quick Ratio	0.84x -> 1.29x	Quick assets +67.30%; Current liabilities +8.22%. Both rise; the numerator grows faster, raising the ratio.
3. Cash Ratio	0.60x -> 1.09x	Available cash equivalents +97.91%; Current liabilities +8.22%. Both rise; the numerator grows faster, raising the ratio.
4. Net Working Capital	14,263.61 -> 41,905.98	Current assets +46.89%; current liabilities +8.22%. The signed CA-minus-CL balance improves.
5. Inventory Turnover	3.54x -> 3.43x	COGS magnitude +6.94%; Average inventory +10.50%. Both rise; the denominator grows faster, reducing the ratio.
6. Receivables Turnover	19.19x -> 18.74x	Net sales +7.97%; Average receivables +10.51%. Both rise; the denominator grows faster, reducing the ratio.
7. Days Inventory Outstanding	103 -> 107	Average inventory +10.50%; COGS magnitude +6.94%. Both rise; the numerator grows faster, raising the ratio.
8. Days Sales Outstanding	19 -> 19	Average receivables +10.51%; Net sales +7.97%. Both rise; the numerator grows faster, raising the ratio.
9. Fixed Asset Turnover	1.08x -> 1.16x	Net sales +7.97%; Closing net PPE +0.14%. Both rise; the numerator grows faster, raising the ratio.
10. Total Asset Turnover	0.49x -> 0.47x	Net sales +7.97%; Closing total assets +13.99%. Both rise; the denominator grows faster, reducing the ratio.
11. Debt Ratio	36.86% -> 34.05%	Total liabilities +5.31%; Total assets +13.99%. Both rise; the denominator grows faster, reducing the ratio.
12. Debt-to-Equity Ratio	0.1377x -> 0.0997x	IBD -13.81%; Common equity +19.05%. A lower numerator and higher denominator both reduce the ratio.
13. Total Debt-to-Total Capital	12.10% -> 9.06%	IBD -13.81%; IBD + equity +15.07%. A lower numerator and higher denominator both reduce the ratio.
14. Times Interest Earned	27.52x -> 36.69x	EBIT +13.27%; Expensed interest -15.03%. A higher numerator and lower denominator both raise the ratio.

Inventory and receivables are two-point averages; PPE/assets/equity/capital are closing balances. Cash means audited available cash equivalents. NWC is a subtraction; n/m can conceal a real signed deficit under the display convention. Debt classifications follow the current workbook, including the KOHC caveat on page 2.

Receivable and inventory days rise. The April 2025 split makes raw EPS, BVPS, DPS and price changes unsuitable as simple performance measures. The split-normalized explanations on the market page are illustrative comparisons, not replacements for official historic prices.

LUCK: why profitability and market measures moved

FY2024 -> FY2025. Percent growth explains arithmetic direction, not an independently proven operational cause. Market ratios use compatible price/share bases within each year.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
15. Gross Profit Margin	33.65% -> 34.28%	Gross profit +10.00%; Net sales +7.97%. Both rise; the numerator grows faster, raising the ratio.
16. Operating Margin	37.24% -> 39.07%	EBIT +13.27%; Net sales +7.97%. Both rise; the numerator grows faster, raising the ratio.
17. Net Profit Margin	24.37% -> 26.58%	PAT +17.74%; Net sales +7.97%. Both rise; the numerator grows faster, raising the ratio.
18. Return on Assets	12.01% -> 12.41%	PAT +17.74%; Total assets +13.99%. Both rise; the numerator grows faster, raising the ratio.
19. Return on Equity	19.02% -> 18.81%	PAT +17.74%; Common equity +19.05%. Both rise; the denominator grows faster, reducing the ratio.
20. Return on Invested Capital	17.35% -> 17.59%	NOPAT +16.64%; Invested capital +15.07%. Both rise; the numerator grows faster, raising the ratio.
21. Basic Earning Power	18.35% -> 18.24%	EBIT +13.27%; Total assets +13.99%. Both rise; the denominator grows faster, reducing the ratio.
22. Earnings per Share	94.54 -> 22.59	Raw EPS crosses a 5-for-1 split. On a common share unit, EPS rises 19.46%; PAT rises 17.74%. The raw EPS fall is mechanical.
23. Book Value per Share	504.30 -> 120.08	Raw BVPS crosses the split. On a common share unit, BVPS rises 19.05%, matching equity growth; normalized closing share count is unchanged.
24. Price-to-Earnings	9.59x -> 15.73x	On a common post-split basis, price rises 95.89%, faster than EPS 19.46%; P/E rises. No historical PSX input is replaced.
25. Market-to-Book	1.80x -> 2.96x	On a common post-split basis, price rises 95.89%, faster than BVPS 19.05%; M/B rises.
26. Dividend Yield	1.65% -> 1.13%	Common-basis DPS rises from Rs3 to Rs4 (+33.33%), but comparable price rises 95.89%; yield falls. Raw DPS Rs15/Rs4 use different units.
27. Enterprise Value/EBITDA	5.18x -> 8.53x	Enterprise value +86.65%; EBITDA +13.34%. Both rise; the numerator grows faster, raising the ratio.

Operating cash flow is almost unchanged at 27,572.57m despite 17.74% PAT growth. Net investing inflow is 11,714.66m and financing outflow is 7,580.98m. Interpret investment maturities/disposals separately from operating receipts. Cash cover is the highest of the five companies.

LUCK split note: the raw scorecard retains original per-year amounts. For explanation only, FY2024 per-share figures are divided by 5 to compare with the post-split FY2025 unit. This creates no new official PSX observation and changes no workbook input. Reported P/E, M/B and yield already pair matching price/share units.

LUCK FY2025 report: business review PDF p144, reporting entity note 1 p245 and standalone statements pp241-244; corporate-action evidence in Audit.

DGKC: five-year results and performance

Measure / PKR m where stated	FY2021	FY2022	FY2023	FY2024	FY2025

Enterprise Value/EBITDA	8.47x	5.52x	4.78x	5.09x	4.52x

Five-year performance is volatile: negative NWC in FY2021-FY2023 and an FY2023 accounting loss are followed by a strong FY2025 recovery. Latest sales rise while COGS falls, lifting gross profit. Expensed interest drops sharply. PAT rises from a very small FY2024 base, so its growth percentage is unusually large. Directors discuss exports, efficiency and lower financing costs (FY2025 PDF p105).

DGKC FY2025 report PDF p105 and standalone financial statements; tax and historical cash classifications in Audit.

DGKC: why liquidity, efficiency and debt moved

FY2024 -> FY2025. Driver percentages compare the actual numerator and denominator, using unrounded workbook inputs. Rising CA or falling CL raises Current Ratio; a falling ratio requires the denominator to outgrow the numerator, or the numerator to fall faster.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
1. Current Ratio	1.30x -> 1.85x	Current assets +14.69%; Current liabilities -19.60%. A higher numerator and lower denominator both raise the ratio.
2. Quick Ratio	0.67x -> 1.06x	Quick assets +27.40%; Current liabilities -19.60%. A higher numerator and lower denominator both raise the ratio.
3. Cash Ratio	0.02x -> 0.05x	Available cash equivalents +66.95%; Current liabilities -19.60%. A higher numerator and lower denominator both raise the ratio.
4. Net Working Capital	9,544.80 -> 21,997.12	Current assets +14.69%; current liabilities -19.60%. The signed CA-minus-CL balance improves.
5. Inventory Turnover	2.58x -> 2.62x	COGS magnitude -3.82%; Average inventory -5.19%. Both fall; the denominator falls faster, raising the ratio.
6. Receivables Turnover	64.45x -> 61.22x	Net sales +8.86%; Average receivables +14.62%. Both rise; the denominator grows faster, reducing the ratio.
7. Days Inventory Outstanding	141 -> 139	Average inventory -5.19%; COGS magnitude -3.82%. Both fall; the numerator falls faster, reducing the ratio.
8. Days Sales Outstanding	6 -> 6	Average receivables +14.62%; Net sales +8.86%. Both rise; the numerator grows faster, raising the ratio.
9. Fixed Asset Turnover	0.83x -> 0.93x	Net sales +8.86%; Closing net PPE -3.29%. A higher numerator and lower denominator both raise the ratio.
10. Total Asset Turnover	0.48x -> 0.49x	Net sales +8.86%; Closing total assets +5.45%. Both rise; the numerator grows faster, raising the ratio.
11. Debt Ratio	45.19% -> 35.13%	Total liabilities -18.04%; Total assets +5.45%. A lower numerator and higher denominator both reduce the ratio.
12. Debt-to-Equity Ratio	0.4525x -> 0.2314x	IBD -36.17%; Common equity +24.81%. A lower numerator and higher denominator both reduce the ratio.
13. Total Debt-to-Total Capital	31.15% -> 18.79%	IBD -36.17%; IBD + equity +5.81%. A lower numerator and higher denominator both reduce the ratio.
14. Times Interest Earned	1.36x -> 4.41x	EBIT +56.28%; Expensed interest -51.84%. A higher numerator and lower denominator both raise the ratio.

Inventory and receivables are two-point averages; PPE/assets/equity/capital are closing balances. Cash means audited available cash equivalents. NWC is a subtraction; n/m can conceal a real signed deficit under the display convention. Debt classifications follow the current workbook, including the KOHC caveat on page 2.

Despite recovery, FY2025 ROE and margins remain below KOHC and the sample mean. DGKC is the only peer with improved latest inventory turnover, but receivable turnover still falls. P/E collapses as EPS recovers, not because the share price falls. Published FY2021 cash ratio remains unresolved.

DGKC: why profitability and market measures moved

FY2024 -> FY2025. Percent growth explains arithmetic direction, not an independently proven operational cause. Market ratios use compatible price/share bases within each year.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
15. Gross Profit Margin	15.94% -> 25.74%	Gross profit +75.77%; Net sales +8.86%. Both rise; the numerator grows faster, raising the ratio.
16. Operating Margin	16.30% -> 23.40%	EBIT +56.28%; Net sales +8.86%. Both rise; the numerator grows faster, raising the ratio.
17. Net Profit Margin	0.82% -> 12.07%	PAT +1,499.40%; Net sales +8.86%. Both rise; the numerator grows faster, raising the ratio.
18. Return on Assets	0.39% -> 5.94%	PAT +1,499.40%; Total assets +5.45%. Both rise; the numerator grows faster, raising the ratio.
19. Return on Equity	0.72% -> 9.16%	PAT +1,499.40%; Common equity +24.81%. Both rise; the numerator grows faster, raising the ratio.
20. Return on Invested Capital	1.87% -> 9.63%	NOPAT +445.63%; Invested capital +5.81%. Both rise; the numerator grows faster, raising the ratio.
21. Basic Earning Power	7.78% -> 11.53%	EBIT +56.28%; Total assets +5.45%. Both rise; the numerator grows faster, raising the ratio.
22. Earnings per Share	1.24 -> 19.80	PAT +1,499.40%; Weighted shares 0.00%. The denominator is unchanged; the numerator drives the movement.
23. Book Value per Share	173.12 -> 216.08	Common equity +24.81%; Closing shares 0.00%. The denominator is unchanged; the numerator drives the movement.
24. Price-to-Earnings	72.92x -> 8.36x	Share price +83.41%; Compatible EPS +1,499.40%. Both rise; the denominator grows faster, reducing the ratio.
25. Market-to-Book	0.52x -> 0.77x	Share price +83.41%; Compatible BVPS +24.81%. Both rise; the numerator grows faster, raising the ratio.
26. Dividend Yield	0.00% -> 1.21%	FY cash DPS resumes at Rs2.00 from zero. Year-end price is Rs165.56; yield becomes positive.
27. Enterprise Value/EBITDA	5.09x -> 4.52x	Enterprise value +25.57%; EBITDA +41.30%. Both rise; the denominator grows faster, reducing the ratio.

Operating cash flow rises to 10,034.13m (+66.42%). Net investing inflow of 3,000.54m and financing outflow of 9,357.69m accompany lower financing balances. These cash categories should not be confused with net profit.

Use this answer structure: state the ratio movement, identify numerator and denominator changes, compare the sample, then explain a supported business cause and limitation. No ratio alone proves liquidity, operational efficiency or investment value.

DGKC FY2025 report PDF p105 and standalone financial statements; tax and historical cash classifications in Audit.

MLCF: five-year results and performance

Measure / PKR m where stated	FY2021	FY2022	FY2023	FY2024	FY2025
Net sales (PKR m)	35,538.3	48,519.6	62,075.3	66,452.3	68,942.4

Enterprise Value/EBITDA	5.62x	4.49x	3.27x	3.35x	3.44x

Latest PAT and EBIT grow much faster than sales. Other income rises from 238.45m to 8,462.66m. Unconsolidated note 39 reports 6,660.316m dividend income, including 6,400.500m from Maple Leaf Power, and 1,693.739m unrealized investment gains. Finance income separately includes treasury-bill gains. Core operating profit also grows, but less rapidly than total EBIT. These are parent-company earnings; intra-group dividends are eliminated in consolidated accounts.

MLCF FY2025 PDF pp172-173; unconsolidated note 39 PDF p265, other income/dividends/fair-value gains; notes 40-41 finance cost/income.

MLCF: why liquidity, efficiency and debt moved

FY2024 -> FY2025. Driver percentages compare the actual numerator and denominator, using unrounded workbook inputs. Rising CA or falling CL raises Current Ratio; a falling ratio requires the denominator to outgrow the numerator, or the numerator to fall faster.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
1. Current Ratio	1.44x -> 1.53x	Current assets +33.07%; Current liabilities +25.45%. Both rise; the numerator grows faster, raising the ratio.
2. Quick Ratio	0.61x -> 0.81x	Quick assets +66.30%; Current liabilities +25.45%. Both rise; the numerator grows faster, raising the ratio.
3. Cash Ratio	0.07x -> 0.07x	Available cash equivalents +17.75%; Current liabilities +25.45%. Both rise; the denominator grows faster, reducing the ratio.
4. Net Working Capital	8,270.04 -> 12,422.11	Current assets +33.07%; current liabilities +25.45%. The signed CA-minus-CL balance improves.
5. Inventory Turnover	3.10x -> 2.79x	COGS magnitude -0.64%; Average inventory +10.58%. A lower numerator and higher denominator both reduce the ratio.
6. Receivables Turnover	19.57x -> 15.67x	Net sales +3.75%; Average receivables +29.59%. Both rise; the denominator grows faster, reducing the ratio.
7. Days Inventory Outstanding	118 -> 131	Average inventory +10.58%; COGS magnitude -0.64%. A higher numerator and lower denominator both raise the ratio.
8. Days Sales Outstanding	19 -> 23	Average receivables +29.59%; Net sales +3.75%. Both rise; the numerator grows faster, raising the ratio.
9. Fixed Asset Turnover	1.01x -> 1.10x	Net sales +3.75%; Closing net PPE -4.79%. A higher numerator and lower denominator both raise the ratio.
10. Total Asset Turnover	0.67x -> 0.58x	Net sales +3.75%; Closing total assets +19.87%. Both rise; the denominator grows faster, reducing the ratio.
11. Debt Ratio	47.05% -> 40.00%	Total liabilities +1.91%; Total assets +19.87%. Both rise; the denominator grows faster, reducing the ratio.
12. Debt-to-Equity Ratio	0.3685x -> 0.2040x	IBD -24.80%; Common equity +35.82%. A lower numerator and higher denominator both reduce the ratio.
13. Total Debt-to-Total Capital	26.93% -> 16.95%	IBD -24.80%; IBD + equity +19.50%. A lower numerator and higher denominator both reduce the ratio.
14. Times Interest Earned	3.20x -> 7.35x	EBIT +93.10%; Expensed interest -15.82%. A higher numerator and lower denominator both raise the ratio.

Inventory and receivables are two-point averages; PPE/assets/equity/capital are closing balances. Cash means audited available cash equivalents. NWC is a subtraction; n/m can conceal a real signed deficit under the display convention. Debt classifications follow the current workbook, including the KOHC caveat on page 2.

Inventory and receivable days rise; total-asset turnover falls as assets grow faster than sales. Lower P/E/EV multiples reflect strong accounting earnings as well as price, and do not alone establish undervaluation. Freight reclassification, revaluation and CWIP affect comparability. No FY cash dividend is attributable to FY2021-FY2025.

MLCF: why profitability and market measures moved

FY2024 -> FY2025. Percent growth explains arithmetic direction, not an independently proven operational cause. Market ratios use compatible price/share bases within each year.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
15. Gross Profit Margin	31.55% -> 34.44%	Gross profit +13.27%; Net sales +3.75%. Both rise; the numerator grows faster, raising the ratio.
16. Operating Margin	19.54% -> 36.38%	EBIT +93.10%; Net sales +3.75%. Both rise; the numerator grows faster, raising the ratio.
17. Net Profit Margin	7.93% -> 24.71%	PAT +223.12%; Net sales +3.75%. Both rise; the numerator grows faster, raising the ratio.
18. Return on Assets	5.31% -> 14.30%	PAT +223.12%; Total assets +19.87%. Both rise; the numerator grows faster, raising the ratio.
19. Return on Equity	10.02% -> 23.84%	PAT +223.12%; Common equity +35.82%. Both rise; the numerator grows faster, raising the ratio.
20. Return on Invested Capital	10.65% -> 22.92%	NOPAT +157.23%; Invested capital +19.50%. Both rise; the numerator grows faster, raising the ratio.
21. Basic Earning Power	13.07% -> 21.06%	EBIT +93.10%; Total assets +19.87%. Both rise; the numerator grows faster, raising the ratio.
22. Earnings per Share	4.98 -> 16.26	PAT +223.12%; Weighted shares -1.07%. A higher numerator and lower denominator both raise the ratio.
23. Book Value per Share	50.23 -> 68.22	Common equity +35.82%; Closing shares 0.00%. The denominator is unchanged; the numerator drives the movement.
24. Price-to-Earnings	7.63x -> 5.18x	Share price +121.79%; Compatible EPS +226.62%. Both rise; the denominator grows faster, reducing the ratio.
25. Market-to-Book	0.76x -> 1.24x	Share price +121.79%; Compatible BVPS +35.82%. Both rise; the numerator grows faster, raising the ratio.
26. Dividend Yield	0.00% -> 0.00%	No dividend is attributable to either FY; the numeric yield remains 0.00% despite the price change.
27. Enterprise Value/EBITDA	3.35x -> 3.44x	Enterprise value +73.07%; EBITDA +68.45%. Both rise; the numerator grows faster, raising the ratio.

Operating cash flow rises from approximately 9,496m to 19,316.64m (+103.41%). Investing uses 9,999.04m and financing uses 7,569.16m. CFO exceeds PAT in FY2025, but cash conversion should still be traced through working-capital and tax notes.

Earnings quality: do not attribute the 223.12% PAT increase entirely to cement operations. The audited other-income breakdown includes subsidiary dividends and unrealized investment gains; consolidated profit differs because intra-group income is eliminated.

MLCF FY2025 PDF pp172-173; unconsolidated note 39 PDF p265, other income/dividends/fair-value gains; notes 40-41 finance cost/income.

FCCL: five-year results and performance

Measure / PKR m where stated	FY2021	FY2022	FY2023	FY2024	FY2025
Net sales (PKR m)	24,271.3	54,243.1	68,069.3	80,026.2	88,956.3
PAT (PKR m)	3,471.4	7,112.5	7,439.7	8,223.1	13,326.2
Total assets (PKR m)	34,052.2	113,698.1	138,828.5	147,636.3	160,845.2

FY2025 CA growth exceeds CL growth and signed NWC turns positive after FY2023-FY2024 deficits. Sales grow faster than COGS, raising margins. EBIT and PAT grow. Interest expense rises slightly, but EBIT grows much faster, so TIE still improves. IBD rises; lower leverage ratios therefore reflect faster growth in equity/capital rather than a fall in debt.

FCCL FY2025 business review PDF pp96-98; ratio tables pp212-216; financing notes including note 11 p268.

FCCL: why liquidity, efficiency and debt moved

FY2024 -> FY2025. Driver percentages compare the actual numerator and denominator, using unrounded workbook inputs. Rising CA or falling CL raises Current Ratio; a falling ratio requires the denominator to outgrow the numerator, or the numerator to fall faster.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
1. Current Ratio	0.96x -> 1.32x	Current assets +56.97%; Current liabilities +14.04%. Both rise; the numerator grows faster, raising the ratio.
2. Quick Ratio	0.34x -> 0.68x	Quick assets +125.89%; Current liabilities +14.04%. Both rise; the numerator grows faster, raising the ratio.
3. Cash Ratio	0.11x -> 0.08x	Available cash equivalents -9.40%; Current liabilities +14.04%. A lower numerator and higher denominator both reduce the ratio.
4. Net Working Capital	n/m (-1,081.40) -> 9,835.07	Current assets +56.97%; current liabilities +14.04%. The signed CA-minus-CL balance improves.
5. Inventory Turnover	3.43x -> 3.16x	COGS magnitude +5.59%; Average inventory +14.47%. Both rise; the denominator grows faster, reducing the ratio.
6. Receivables Turnover	17.55x -> 14.28x	Net sales +11.16%; Average receivables +36.62%. Both rise; the denominator grows faster, reducing the ratio.
7. Days Inventory Outstanding	107 -> 115	Average inventory +14.47%; COGS magnitude +5.59%. Both rise; the numerator grows faster, raising the ratio.
8. Days Sales Outstanding	21 -> 26	Average receivables +36.62%; Net sales +11.16%. Both rise; the numerator grows faster, raising the ratio.
9. Fixed Asset Turnover	0.72x -> 0.81x	Net sales +11.16%; Closing net PPE -1.14%. A higher numerator and lower denominator both raise the ratio.
10. Total Asset Turnover	0.54x -> 0.55x	Net sales +11.16%; Closing total assets +8.95%. Both rise; the numerator grows faster, raising the ratio.
11. Debt Ratio	50.28% -> 47.61%	Total liabilities +3.15%; Total assets +8.95%. Both rise; the denominator grows faster, reducing the ratio.
12. Debt-to-Equity Ratio	0.4985x -> 0.4751x	IBD +9.42%; Common equity +14.81%. Both rise; the denominator grows faster, reducing the ratio.
13. Total Debt-to-Total Capital	33.27% -> 32.21%	IBD +9.42%; IBD + equity +13.02%. Both rise; the denominator grows faster, reducing the ratio.
14. Times Interest Earned	3.78x -> 4.79x	EBIT +30.28%; Expensed interest +2.73%. Both rise; the numerator grows faster, raising the ratio.

Inventory and receivables are two-point averages; PPE/assets/equity/capital are closing balances. Cash means audited available cash equivalents. NWC is a subtraction; n/m can conceal a real signed deficit under the display convention. Debt classifications follow the current workbook, including the KOHC caveat on page 2.

FY2025 financial leverage remains highest among the peers and interest cover is far below KOHC/LUCK. The FY2022 Askari merger limits like-for-like average-balance comparisons. Interest-free parent funding and capitalized/expensed interest need classification care. Several published turnover, P/E, DSO and TIE comparisons remain unresolved.

FCCL: why profitability and market measures moved

FY2024 -> FY2025. Percent growth explains arithmetic direction, not an independently proven operational cause. Market ratios use compatible price/share bases within each year.

Measure	FY2024 -> FY2025	Numerator/denominator explanation
15. Gross Profit Margin	32.09% -> 35.49%	Gross profit +22.94%; Net sales +11.16%. Both rise; the numerator grows faster, raising the ratio.
16. Operating Margin	26.09% -> 30.58%	EBIT +30.28%; Net sales +11.16%. Both rise; the numerator grows faster, raising the ratio.
17. Net Profit Margin	10.28% -> 14.98%	PAT +62.06%; Net sales +11.16%. Both rise; the numerator grows faster, raising the ratio.
18. Return on Assets	5.57% -> 8.29%	PAT +62.06%; Total assets +8.95%. Both rise; the numerator grows faster, raising the ratio.
19. Return on Equity	11.20% -> 15.81%	PAT +62.06%; Common equity +14.81%. Both rise; the numerator grows faster, raising the ratio.
20. Return on Invested Capital	10.17% -> 13.55%	NOPAT +50.60%; Invested capital +13.02%. Both rise; the numerator grows faster, raising the ratio.
21. Basic Earning Power	14.14% -> 16.91%	EBIT +30.28%; Total assets +8.95%. Both rise; the numerator grows faster, raising the ratio.
22. Earnings per Share	3.35 -> 5.43	PAT +62.06%; Weighted shares 0.00%. The denominator is unchanged; the numerator drives the movement.
23. Book Value per Share	29.92 -> 34.36	Common equity +14.81%; Closing shares 0.00%. The denominator is unchanged; the numerator drives the movement.
24. Price-to-Earnings	6.83x -> 8.22x	Share price +94.98%; Compatible EPS +62.06%. Both rise; the numerator grows faster, raising the ratio.
25. Market-to-Book	0.77x -> 1.30x	Share price +94.98%; Compatible BVPS +14.81%. Both rise; the numerator grows faster, raising the ratio.
26. Dividend Yield	4.36% -> 2.80%	FY cash DPS +25.00%; share price +94.98%. Price rises faster, reducing yield.
27. Enterprise Value/EBITDA	3.90x -> 4.58x	Enterprise value +51.26%; EBITDA +29.00%. Both rise; the numerator grows faster, raising the ratio.

Operating cash flow rises to 24,313.21m (+9.10%). Investing uses 11,259.19m and financing uses 12,739.19m. Historical dividend yield is the highest in FY2025, although it falls because the share-price increase outpaces DPS growth.

Use this answer structure: state the ratio movement, identify numerator and denominator changes, compare the sample, then explain a supported business cause and limitation. No ratio alone proves liquidity, operational efficiency or investment value.
